### **DETAILED ACTION**

1. This application is in condition for allowance except for the following formal matters:

#### ***Specification***

2. The disclosure is objected to because of the following informalities:

Regarding page 7, line 9: Replace "lower shell 13" with lower shell 12 as to be consistent with the rest of the specification and with the Figures.

Regarding page 7, line 23: Replace "pivot holes 111 and 112" with pivot holes 111 and 121 since reference number 112 refers to a pivot seat in the specification.

These citations are just two examples of misreferenced numbers. Please ensure that all reference numbers are referenced correctly in the specification.

Appropriate correction is required.

#### ***Drawings***

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Reference numbers 2433 and 2444 are in the specification on page 11, lines 22-23 but do not appear in Figure 7.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as

either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

4. Claims 1-21 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

The best prior art of record fails to teach an external connecting electronic apparatus connector with both hidden and rotary capabilities. For example, the best prior art of Lee (U.S. Patent No. 6,648,224) teaches a flash memory card reader with a hidden universal series bus terminal, but fails to teach the arrangement of having a rotary hidden connector. Further, the best prior art of record fails to teach the specific relationship of having a cap plate pivotally coupled on an end of the housing compartment in a turnable manner corresponding to the connector having a masked position for covering the case body and an open position turned outwards and wherein the cap plate is movable from the masked position to the open position to push the connector moving from the different positions (i.e. from hidden position to connecting position).

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Art Unit: 2876
